Description

Deco's Evian Tube LED system series suspended direct LED luminaire serves as a connector to the Evian tube system. The combination of the variable and fixed angle connector allow for flexible lighting solutions in architecturally constrained spaces. The versatile Evian Tube LED series is best suited for open offices, private offices, conference rooms, reception areas, educational facilities and architecturally constrained spaces.

EVIAT-LED

Features

Construction

Aluminum profile frame with central or lateral tubes in aluminum extrusion. End caps in ABS plastic.

Reflectors

Inside reflectors made of 99.9% pure aluminum.

Diffuser

Semitransparent linear prismatic PMMA diffuser.
